4202	Polygon	BEVERLY HILLS CIC	9925		SANTA MONICA
3618	Polygon	SONO	9915		SANTA MONICA
		SONA			CASITA MARINA

# GIS has always required Interoperability

- Geographic analysis
  - Multiple sources, multiple organizations
  - Distributed within a community
  - Merging diverse information types
- and continues to...
- Enterprise GIS
  - GIS evolving beyond isolated communities
  - GIS merging with broader IT infrastructures
- GIS Web Services
  - Enabled by distributed networks
  - Loosely coupled

# Varieties of Interoperability

- Technical
- Semantic
  - Inter-disciplinary
- Political/Human
  - Legal

# Interoperability Enablers

- Infrastructure
  - Compatible Technology
- Authorization
- Copyright
- Business Agreements
  - MOUs
- Business Model
  - Pricing/commerce
- Metadata
- Security
  - Privacy
- Information Assurance
  - Certification
  - Quality
- Standards

# Participation in Standards

- **Implementing**

- Platform
- GIS standards
- IT/industry standards

- **Development**

- International Standards
- Regional Standards
- National Standards
- Information Community Standards
- NATO ICAO, IHO...

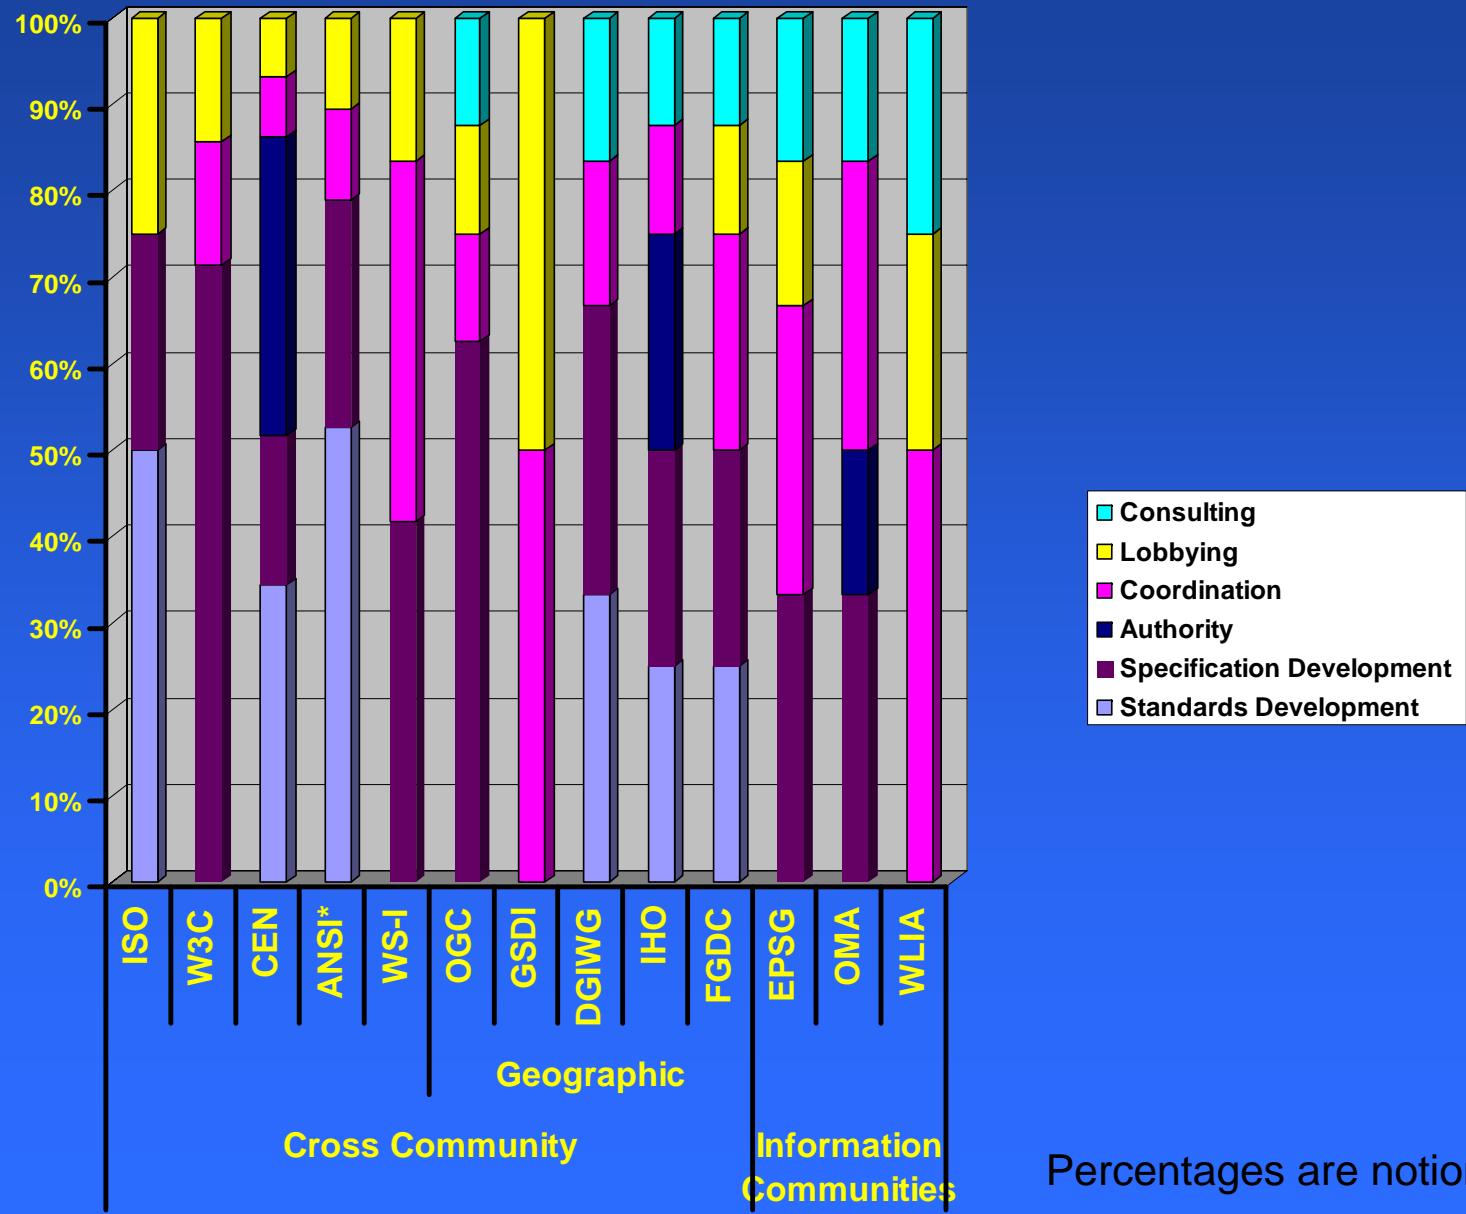

# ESRI Actively Participates in Interoperability & Standards Organizations

- ISO – International Organization for Standardization
- OGC – Open GIS Consortium
- ANSI/INCITS – American National Standards Institute/International Committee for Information Technology Standards
- OASIS – Organization for the Advancement of Structured Information Standards
- IHO – International Hydrographic Organization
- WS-I – Web Services Interoperability Organization
- OMA – Open Mobile Alliance (formerly LIF)
- WLIA – Wireless Location Industry Association
- FGDC – Federal Geographic Data Committee
- GSIDI – Global Spatial Data Infrastructure
- CEN – Committee for European Normalization
- DGIWG – Digital Geographic Information Working Group
- EPSG – European Petroleum Survey Group

# Standards Organizations

# ISO Participation

- ESRI provides leadership role in **ISO TC 211** Standards Development:
  - ISO 19115: Metadata (Project Leader)
  - ISO 19115-2: Metadata – Imagery extension (Editor)
  - ISO 19125: Simple Feature Access (Editor)
    - Part 1 – Common Architecture
    - Part 2 – SQL Option
  - ISO 19139: Metadata – Implementation Specification (Project Leader – supported Editor/committee process)
- Provide technical experts on many WI project teams
- Harmonization with **ISO JTC SC 32**: ISO/IEC 13249-3: 1999
  - SQL Multimedia and Application Packages – Part 3: Spatial

# ISO TC 211- completed standards

## Guiding ESRI Development

- ISO 19101:2002 - Reference model
- ISO 19105:2000 - Conformance and testing
- ISO 19106:2004 - Profiles
- ISO 19107:2003 - Spatial schema
- ISO 19108:2003 - Temporal schema
- ISO 19110:2005 - Methodology for feature cataloguing
- ISO 19111:2003 - Spatial referencing by coordinates
- ISO 19112:2003 - Spatial referencing by geographic identifiers
- ISO 19113:2002 - Quality principles
- ISO 19114:2003 - Quality evaluation procedures
- ISO 19115:2003 - Metadata
- ISO 19116:2004 - Positioning Services
- ISO 19119:2005 - Services
- ISO 19125:2004 - Simple feature access – Part 1-2
- And several technical reports

# ISO TC 211- DIS stage

Guiding ESRI Development

- ISO/DIS 19104 - Terminology
- ISO/FDIS 19109 - Rules for application schema
- ISO/DIS 19117 - Portrayal
- ISO/DIS 19118 - Encoding
- ISO/DIS 19123 - Schema for coverage geometry and functions
- ISO/DIS 19128 - Web Map server interface
- ISO/DIS 19133 - Location based services tracking and navigation
- ISO/DIS 19135 - Procedures for registration of items of geographic information
- ISO/DIS 19137 - Core profile of the spatial schema
- ISO/PDTS 19139 - Metadata – XML Schema implementation

# OGC Participation

- **ESRI**
  - Principle member
  - Actively participates:
    - Technical Committee
    - Planning Committee
    - Board of Directors
    - All three OGC programs
      - Interoperability program
      - Standards program
      - Community Outreach and Adoption program
    - Current chair
      - Metadata Working Group (WG)
      - Location Services WG
    - Sponsors
      - Open Location Services Initiative

# OGC specifications and Interoperability

- Data Management
  - Simple Features
- Data Formats
  - GML
- Web Services
  - Web Services
  - Catalog Services

# OGC “Specifications”

# Adopted OGC Specifications Implemented by ESRI

- Catalog Interface (CAT)
- Coordinate Transformation Services (CT)
- Filter Encoding (Filter)
- Geography Markup Language
- Grid Coverages (GC)
- Location Services (OpenLS)
- Simple Features – CORBA (SFC)
- Simple Features – SQL (SFS)
- Simple Features – OLE/COM (SFO)
- Styled Layer Descriptor (SLD)
- Web Coverage Service (WCS)
- Web Feature Service (WFS)
- Web Map Context Documents (WMC)
- Web Map Service (WMS)

ArcSDE SQL Server	9.0	Server	SFS BG 1.1	Implementing

# Summary

- **Interoperability has always been important to GIS**
  - Many flavors of interoperability
  - Standards: one of the things that make interoperability happen
- **ISO and OGC standards are maturing and moving into the market**
- **ESRI has a long history with interoperability**
  - Involvement with standards development organizations
  - Implementing GI and IT standards, multi-platform, multi-DBMS
- **ESRI will continue this commitment to interoperability**
  - ESRI will implement all standards and specifications that contribute to interoperability and make business sense
- **Participate with us – tell us what's important**

# Thank you
