ASAR WS 17 Feb 04

ASAR WS 31 Dec 04

Major changes to coastal line becoming fuzzy and withdrawn of several tens of pixel in some places + missing major reflectors along shore after tsunami

Color comp ASAR WS R : after G : before : B: after

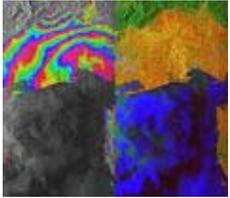

- Initial period completed end 2003 Final Report (EC, ESA), EC Communication
- Programme Office instituted with EC/ESA/other staff
- GMES Advisory Council created – second meeting Dec 2004 – Action plan developed
- Preparatory activities started in ESA September 2004
- 12 Initial Services under development in ESA, to end 2006
- Preparation of the overall C(Min) proposal based on EC/ESA GMES initial Period Report and EC Communication

Based on GMES Initial Period Report and EC GMES Communication:

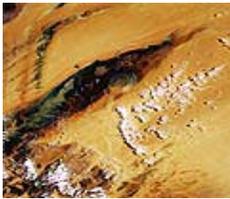

ESA GMES Preparatory programme:

4 Elements

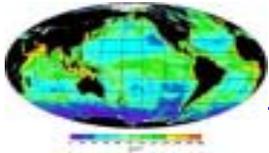

- Socio-economic analysis
- Architecture
- Ground Segment
- Space observation component - “Sentinels”

- Sentinel 1 – SAR imaging
 - All weather, day/night applications, interferometry

- Sentinel 2 – Superspectral imaging

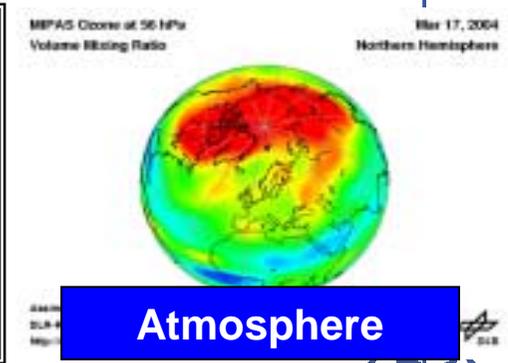

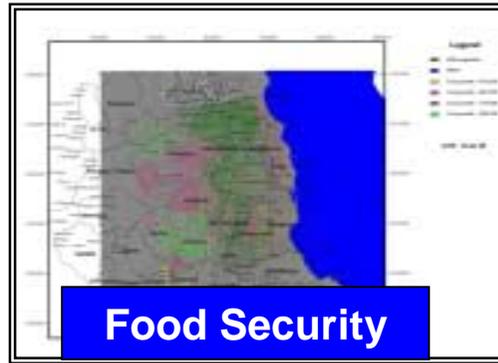

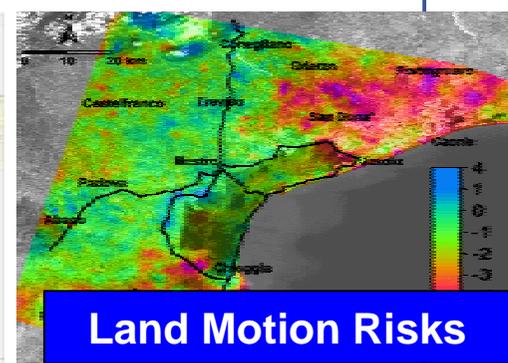

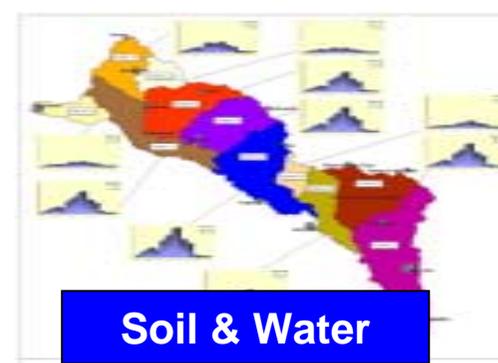

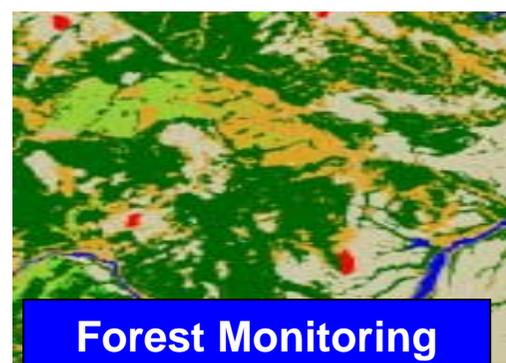

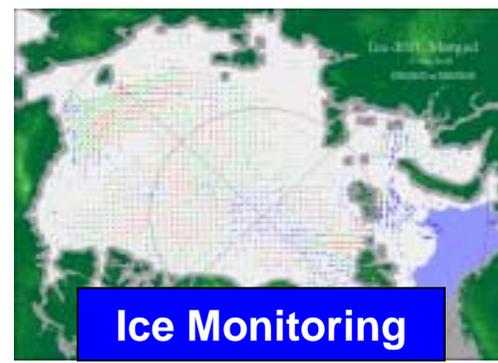

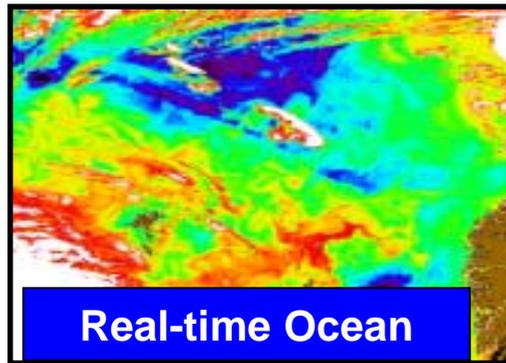

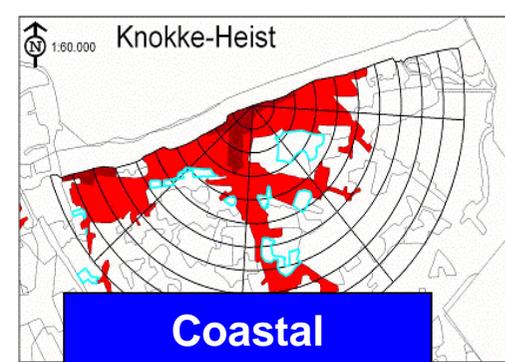

- Sentinel 3 – Ocean monitoring
 - Wide-swath ocean color and surface temperature sensors, altimeter

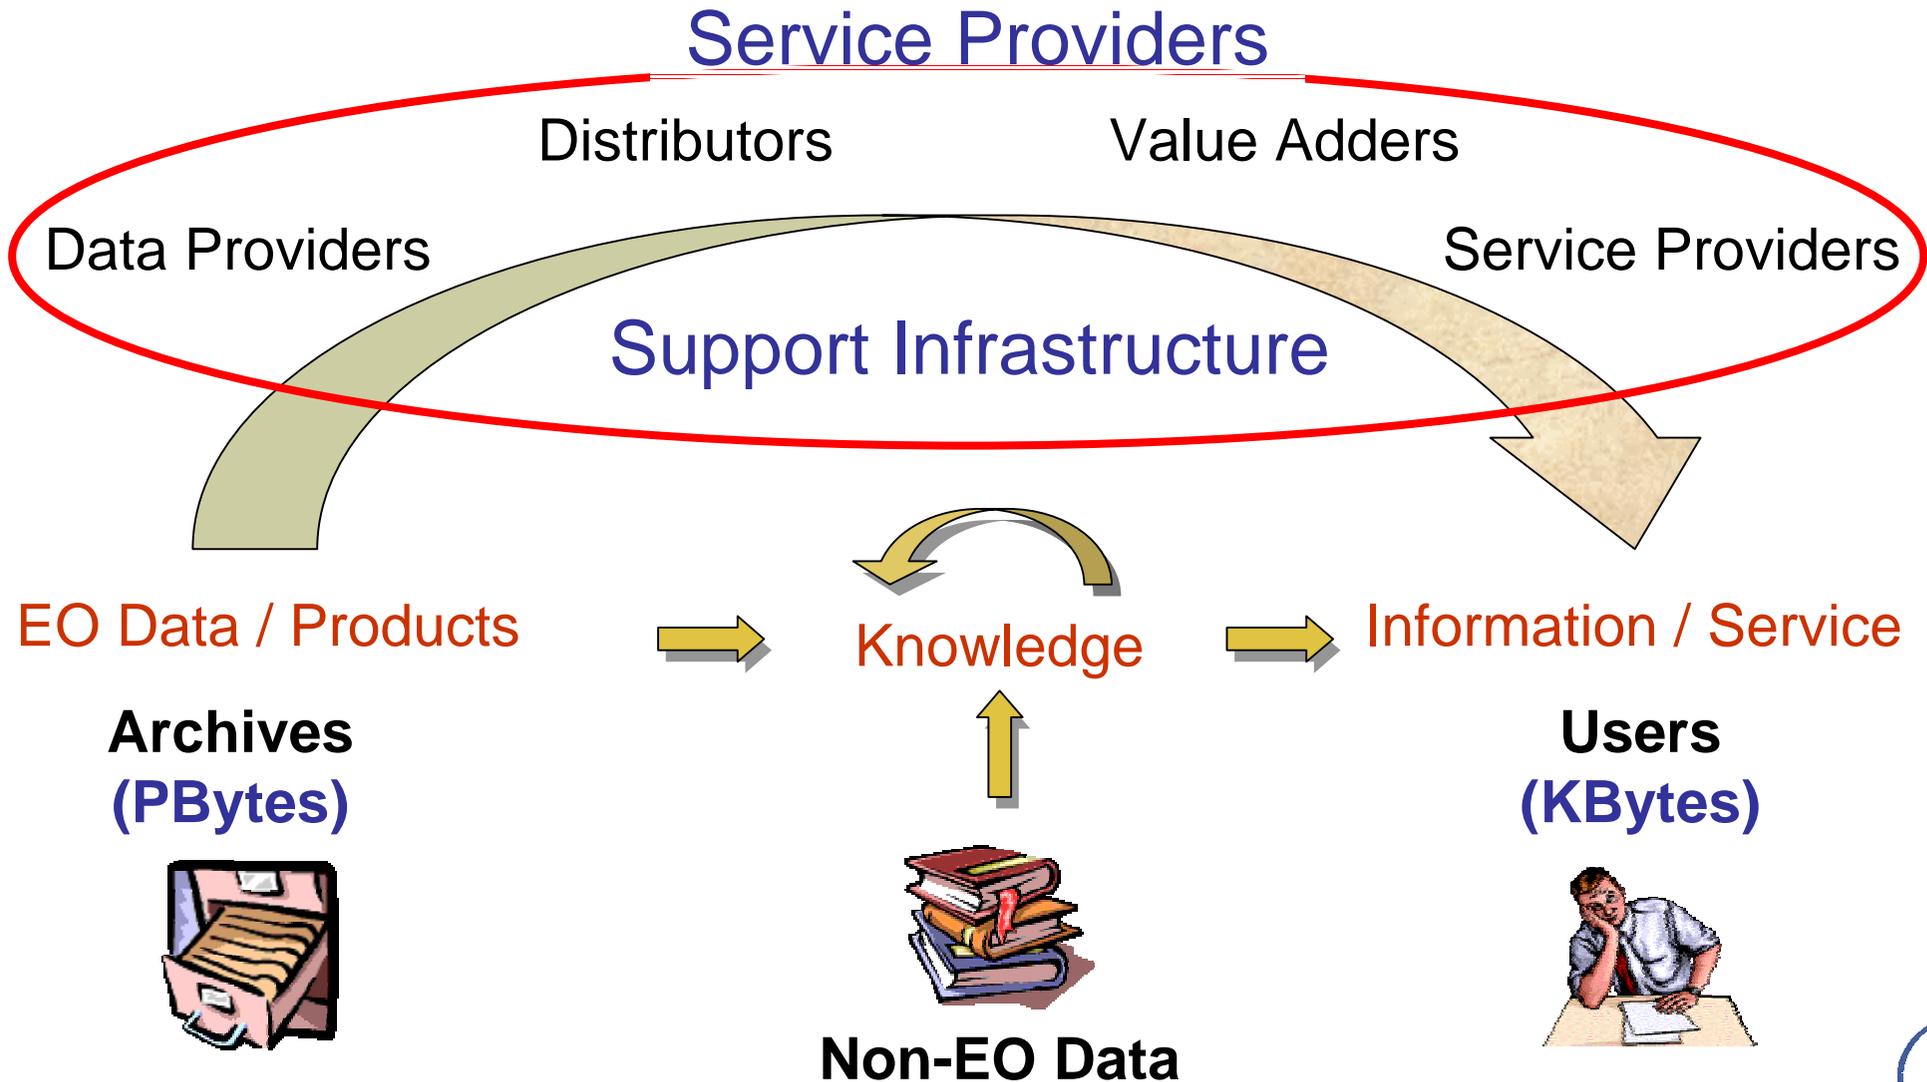

- Sentinel 4 – Geostationary atmospheric
 - Atmospheric composition monitoring, trans-boundary pollution
- Sentinel 5 – Low-orbit atmospheric
 - Atmospheric composition monitoring

The space component of GMES will

- answer to user needs identified
- complement existing European capabilities
- close technology gaps
- be implemented in close coordination of all European and Canadian resources (including Eumetsat)

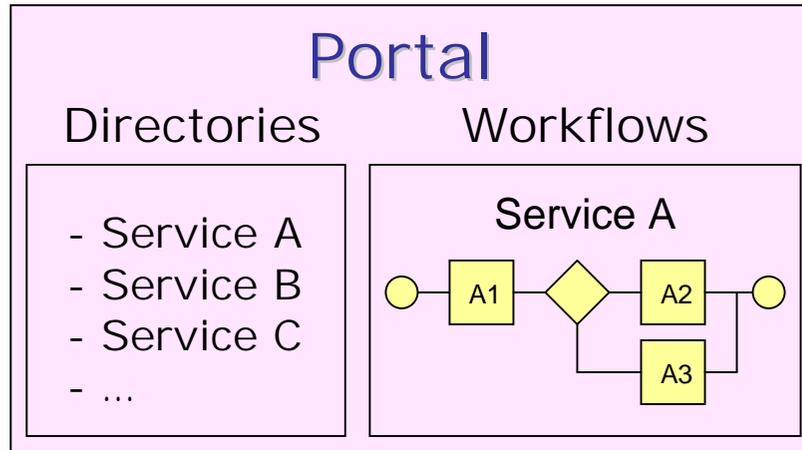

Requests

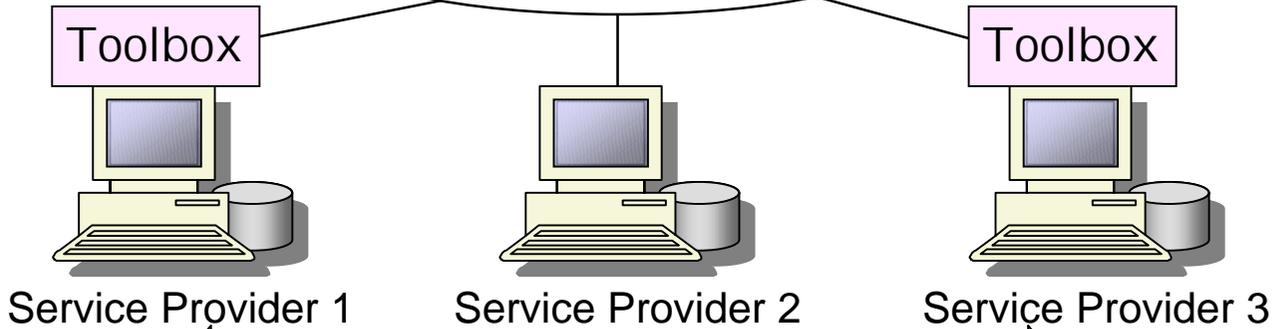

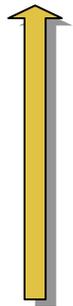

Info

- Service publication, chaining, fruition
- On-line / off-line services
- Services remain at providers' facilities
- Data exchanges outside Portal
