AMFM porta BIM, infrastrutture e smart cities al centro del Myanmar Infrastructure Summit 2014

Redazione GEOmedia

La Repubblica della Unione del Myanmar (Birmania) organizza e patrocina, dal 18 al 19 marzo, una conferenza sui vari aspetti delle infrastrutture da sviluppare nel paese, il [Myanmar Infrastructure Summit 2014](#).

La Conferenza metterà a confronto politici, amministratori pubblici, investitori e tecnici per tracciare il futuro sviluppo di una nazione che culturalmente, socialmente e per l'ambiente rappresenta una risorsa mondiale. Saranno trattati temi a largo spettro: dalle infrastrutture civili tradizionali alle smart cities, così come potranno essere coniugate in modo sostenibile. AMFM GIS Italia è stata invitata a patrocinare la manifestazione ed a presentare una relazione sull'argomento delle infrastrutture verdi nelle costruzioni, che verrà tenuta dal presidente Prof. Mauro Salvemini. Attraverso tale partecipazione AMFM GIS Italia, nell'ambito della sua dimensione internazionale, svolge il suo ruolo di testimone e di diffusore delle tecnologie sostenibili per la informazione ed i dati geografici e cartografici. È noto che i trend considerano il BIM (Building Information Modeling) e le infrastrutture di dati territoriali e cartografici come elementi fondamentali del futuro sviluppo di infrastrutture per gli insediamenti umani. È quindi con interesse che l'invito è stato raccolto in questo specifico momento nel quale Myanmar Framework for Economic and Social Reforms pone le basi per le infrastrutture e la connettività della nazione.

Alcuni soci di AMFM GIS Italia (Epsilon srl, Setin srl, U-space) con specifici interessi nelle tematiche della conferenza hanno già sinora aderito alla iniziativa.

ENGLISH VERSION

MYANMAR GOVERNMENT TO HOST INFRASTRUCTURE SUMMIT AS EFFORT IN ATTRACTING MORE FOREIGN DIRECT INVESTMENT TO DEVELOP THE INFRASTRUCTURE AND CONSTRUCTION INDUSTRIES

The Republic of Union of Myanmar Federation of Chambers of Commerce & Industry (UMFCCI) with the support of Myanmar Ministry of Construction will be organising the Myanmar Infrastructure Summit 2014 from 18 – 19 March 2014 at Traders Hotel, Yangon to attract more potential foreign investors to develop the infrastructure and construction sectors in Myanmar.

Realizing the inadequate infrastructure – roads, bridges, canals, railways, ports, communication facilities, public buildings, commercial and residential real-estates is impeding the economic growth, and there is much demand for infrastructure development in Myanmar, including both renovation of existing infrastructure and new projects; the Myanmar government has started many public work programs after the economic liberalization.

The staging of the Myanmar Infrastructure Summit 2014 is aimed to provide a platform for the international infrastructure and construction industry players and potential investors to gather in Yangon to understand the market potential and development plan of various infrastructure sectors in Myanmar, implication of new economic regulations arising from latest parliamentary decision for the infrastructure and construction sectors.

Planned by Confexhub; a thought leader network solution agency based in Kuala Lumpur, Malaysia and supported by the Myanmar Investment & Trade Centre; the Myanmar Infrastructure Summit 2014 themed 'Building the Future of Myanmar', will bring together over 20 speakers from the Myanmar ministries, agencies, consultants and advisors to provide industry status updates, discuss on investment opportunities and policies. The focus areas of the discussion including:

- Market Outlook & Opportunities
- Myanmar Infrastructure Development Plans
- Investment Policies
- Taxation and Incentives
- Legal Protection
- Project Financing Options
- Land Acquisition
- Supply Chain Management
- Smart City Framework for Myanmar

According to the organizer, over 200 international delegates from the region is expected to converge at this summit to meet face-to-face with the relevant authorities to have better understanding on the investment opportunities, policies and regulations, at the same time to network with the potential local business partners for their venture in Myanmar.

According to Datuk Dr. Abdul Aziz, the Chairman of Confexhub, "Myanmar is a country that has high potential for rapid growth and development given its rich natural resources, abundant labour force, great geographical location and a government that determined to embrace economic and politic change." "Under the Myanmar Framework for Economic and Social Reforms, immediate priority will be given to infrastructure projects to improve land connectivity and transportation links with regional economies to boost economic integration."

"We urge all industry players, supporting industries, contractors and suppliers to take this opportunity to join us at this summit to explore the investment potential of Myanmar, get the first hand information directly from the Ministry of National Planning and Economic Development, Ministry of Construction, Ministry of Transportation, Ministry of Industry, Yangon City Development Committee and other relevant ministries and agencies on the current status update and outlook of the industry; and better understanding on the latest investment policies, regulation and incentives", said Datuk Dr. Abdul Aziz.

Mr. Paul Yeo, the Director of the Myanmar Infrastructure Summit 2014 commented, "Myanmar could be the last frontier in Asia. Although many investors sees it as not an easy place to do business initially, but most of them feel the risk of missing the opportunity is greater. They look at Myanmar as a long-term opportunity" He added, "The Ministry of Construction is excited with the hosting of this summit.

Preparations are underway for an exhilarating event which will incorporate a high calibre summit, a comprehensive showcase of products and services, business-matching meetings between the international and local industry players and post-summit workshop". "We see the importance to provide a platform to equip potential investors on the relevant information on the key development issues of investing in Myanmar's infrastructure and construction industry and new economic regulations arising from the latest parliamentary decision, so that they could benefit from the early-mover advantage," said Mr. Paul Yeo.
